Art Unit: 2836

***Detailed Actions  
Drawings***

1. The drawings are objected to under 37 CFR 1.83(a) because they fail to show where in a portable computer an LCD display control board 3, an insulated sleeve 4 and a metal foil 5 are located. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

1. The disclosure is objected to because of the following informalities: On page 3, line 1 in a sentence "to provide a. static discharge protection module" a dot should be removed.

On page 3, line 4 in a sentence "to provide a. a. static discharge protection module" ". a." should be removed.

The sentence "a metal foil adhered to the insulation sleeve for collecting static to conduct to ground" on page 2, lines 22-23 meant, probably, to indicate process of collection of electrostatic charges and conducting them to the ground.

Appropriate correction is required.

### ***Claim Objections***

2. Claims 1 and 4 are objected to because of the following informalities: the limitation "sleeve for

Art Unit: 2836

collecting static to conduct to ground" is not clearly stated. Appropriate correction is required.

3. Claim 1 required "n insulation sleeve" instead "an insulation sleeve".

Appropriate correction is required.

***Allowable Subject Matter***

4. Claims 1-6 would be allowed, when objections to Claims 1 and 4 are overcome.

**The following is an examiner's statement of reasons for allowance:**

5. Independent Claims 1 and 4 would be allowable because none of the prior art of record disclose an electro static discharge protection module of LCD display control board wherein a metal foil adhered to an insulation sleeve, into which the LCD display control board is inserted, is collecting electro-static charges and conducting them to the ground in combination with the other claim limitations.
